Furniture and House Furnishings.

## JUST RECEIVED

King Apples,

Fresh Evaporated Fruits,

Fresh Nuts of all Kinds.

S. W. CARROLL.

H. T. HOWARD, Manager.

### Another Speeder Coming.

The New York Herald says W. K. Vanderbilt, Jr., will bring his 60-horsepower machine to Daytona to participate in the great international auto meet.

### Death at Ormond.

William Vining died at Ormond Monday of heart trouble, at the age of 72 years. The body was embalmed by Bingham & Maley and was buried Tuesday afternoon in the Ormond Cemetery. Decayed was an uncle of J. P. Vining, the well known hotel man.

### An Approaching Marriage.

Cards are out announcing the marriage, on Tuesday, December 8, 1903, at 12 o'clock, noon, of Miss Margaret Edna Stackhouse and Eugene Ray Conrad. The ceremony will be performed at the home of the bride in DeLand. The groom has many friends in Daytona, who extend congratulations.

### Plenty of Game.

Leonard Gill, John Roberts and Mr. Bruce went up towards Mount Zion the first of last week on a hunting trip, and returned Sunday evening well supplied with game. They killed one bear, two deer and one turkey during the five days they were out.

### Municipal Matinee.

Edom Bonum and Jim Mitchell, two citizens of Waycross, got into a difficulty Saturday evening, and were before the Mayor's Court Monday morning on the charge of disorderly conduct. His Honor let them go on their way rejoicing after paying the costs of the court, and "burying the hatchet."

### A Bear Possibility.

W. H. Parker, John Livingston and J. P. Hanie went to the head of the Halifax Saturday looking for deer. They saw no deer, but Mr. Parker spied a bear and emptied his gun at the animal. Bruin took after his molester and in trying to outrun the bear Mr. Parker fell and broke his gun. The bear is still in the woods.

### Will Dredge New Channel.

Money has been subscribed to dredge a channel from C. G. Burgoynne's channel to the proposed dock in front of the office of the Florida Motor Company. The channel will be deep enough to have four feet of water at low tide, thus insuring a passage way for boats at all times. A pocket 50 feet wide will be cut at the end of Gillie's and the Florida Motor Company's docks in order to allow a turning place for the boats.

### Their Automobiles Coming.

The Florida Motor Company, of which W. H. Peters is the manager, have received the first of their stock of Cadillac automobiles and the rest will follow later.

The Olds Motor Works wired them Monday that a carload of Oldsmobiles will be shipped next week. Mr. Peters is having the lot made with special axles to fit Florida roads. Two Winton Touring Cars are also expected in a few days.

### A New Railroad Proposed.

Melbourne, Nov. 29.—J. O. Fries has begun the preliminary survey for the Central Florida & Indian River Railway. The line commences at a point between Malabar and Viera, and runs to Melbourne, and then to the St. Johns river, south of Lake Washington, then from the St. Johns to Kissimmee, via St. Cloud. The road has Bartow as a probable terminus, and possibly also Orlando. There is good ground for the belief that the work of construction will begin at an early day.

### Company "L" Elects a Captain.

Company "L," Second Regiment, F. S. T., located at Miami, held an election Thursday evening to fill the vacancy caused by the promotion of Capt. J. T. Sanders, to be Lieutenant Colonel on Governor Jennings's staff.

The election was warmly contested, although the best of feeling prevailed.

The contest laid between First Lieutenant McCombs and Second Lieutenant Jaudon, both popular members of the company and efficient officers.

Lieut. Jas. F. Jaudon was declared duly elected Captain, and will receive the commission.

The retiring Captain has made a very successful commanding officer, and has kept his company fully in line with others over the State.

Capt. Jaudon has had a large experience in military matters and has well earned the honors which have come to him.

### Poetical Congratulations.

We hail the new morning paper,  
And wish for it every success;  
We hope for it many subscribers.  
A million, more or less.

We wish for the new little paper,  
Every good, may no enemies lurk;  
May the Editor not have enough pockets,  
But have to put one in his shirt.

To hold all the dimes and the dollars,  
Sent to him in every mail,  
With items of news and good wishes  
That will come by ship and by rail.

Please accept our congratulations,  
I am sure that you will the dimes;  
And give us the news of our city,  
In these busy and prosperous times.

A SUBSCRIBER.

### Elected a Delegate.

The members of the First M. E. church held an election Tuesday to select a delegate to the annual conference which meets at Tarpon Springs, January 28, next. J. M. Garland was chosen, the vote being almost unanimous for him.

The lay electoral conference is composed of one lay delegate from each pastoral charge in each conference which meets at the same time as does the ministerial annual conference. At this session the ministers select one delegate for every forty-five members of the annual conference to represent the church in the general conference, which meets next May in Los Angeles, Cal. The lay electoral conference may select the same number of delegates to represent them in the general conference. The meeting of this body next May will be the largest ever held in the history of the church, as it will require more than eight hundred members to fully represent the church. When it is remembered that each pair represents but forty-five ministerial members of each annual conference, some idea of the size of this church can be obtained.

### After Hard Wood Lands.

Capitalists are in Florida and other Southern States buying up all the woodlands where they can be obtained at a low figure. The immense pine forests for turpentine and lumber purposes having been bought up, these moneyed men now seek the hard woods of the hammocks for transportation to Northern cities to be converted into furniture and fine railroad coaches. Saw mills are to be located near points where the hard wood is available. There is evidently much more money in these timbered lands than many owners imagine. It is also evident that all kinds of timber is becoming scarce in the Northern States, and hence the seeking of timber in the Southern States—Jacksonville Metropolis.

### Drummers Must Pay License.

The city charter of Daytona provides that drummers for wholesale houses who solicit orders from hotels or private individuals must pay a license tax of \$25. The validity of the law having been questioned by several traveling salesmen, Mayor Smith wrote to the attorney general of the State for his opinion as to whether or not the city had power to collect the license. Following is the Attorney General's reply: "Your favor of 18th inst. has been received. It seems that section 20 of chapter 4640, acts of 1897 and sections 2, 43 and 44 of chapter 5106, acts of 1903 give to the city of Daytona power to impose a license tax, not exceeding fifty per cent of the State license tax on all persons or dealers, traveling from place to place selling goods, wares or merchandise of all descriptions, except articles manufactured in Florida and sold to dealers only by the producers or manufacturers thereof. These sections of course do not apply to non-residents who take orders for goods in another State to be delivered as ordered."

### The Bridge Broke In.

The draw bridge over the Halifax River at Ormond is not in working order and all traffic is obliged to come to Daytona to cross the river.

A carload of brick was being hauled over the bridge Monday night for the Hotel Ormond when the draw gave way, dumping the car in the channel of the river. A team belonging to Oscar Michael, of this city, was hauling the car when the accident happened and it was only by a miracle that the team was saved from drowning. The Florida East Coast Railway, who own the bridge, are already at work repairing the damage, but it will be several days before traffic can be resumed.

### Serious Accident at Osteen.

The little eight-year-old son of Kirby Osteen came near meeting with a horrible accident the other day at his father's syrup mill at Osteen, this county. He was playing around the mill when his head was caught between the lever, pulled by two horses, and an upright of the mill. A young man by the name of Brooke saw the accident just in time to stop the horses and draw the lever back, preventing the little fellow's head from being crushed into pulp. As it was both cheeks were mashed, and the blood flowed from his nose. One eye was almost mashed out.

### Pickings from Port Orange.

Port Orange, Nov. 30.—Port Orange welcomes the advent of the Gazette-News in its daily edition.

With one or two exceptions our winter residents are domiciled in their several homes for the season.

Mrs. Meeker, with Miss George, arrived last Saturday night.

Capt. Fozzard has his new boat ready to launch this week. It is one of the prettiest boats in these parts. The Captain is the whole-souled man of the town, very popular, and deserves the honor of the prettiest boat on the river.

Miss Bessie Campbell, of North Georgia, is spending the winter with her old friends, Mr. and Mrs. J. L. Pattillo.

The cold snap of last week did no other damage than nip a few top leaves of the bananas.

### Offers a Rare Opportunity.

The Daytona Choral Society lacks but about half a dozen members of having a hundred. Prof. Blount is managing them in such a way that if at all possible to become careful singers they will be such. The Society offers a rare opportunity to all music lovers. Monday night it was announced that all holders of membership cards must present them at the door hereafter, and all others who desire to attend have the privilege of becoming members on payment of the fee.

### A Visit to the High School.

A Gazette-News representative visited our public school Monday and had quite an encouraging glimpse into the inner workings, and the ideals and aims of those who mold the minds of the children. Our first call was at the so-called, was on the third and fourth grade room—Miss Rose Noble being in charge. Her classes are well drilled. A class in arithmetic was at the board when we entered. The problems that confronted them, unsolved were made so clear that the untrained minds caught them very readily. Our next visit was quite a long step-up stairs and to the high school room, where Miss M. E. Brown, assistant high school teacher, has sole charge. Miss Brown has long since demonstrated the thoroughness of her work in this special department. A class of some ten or twelve were discussing "Evolution." The points brought out by the questions and answers showed a searching analysis of the writer's intention. A thinker always stimulates thought in the minds of others, and this is specially the case when the relation between them is that of teacher and pupil. We reserved our last visit for Prof. Adams' recitation room. He is very ambitious for the school, and it must sustain or even excel its past reputation as to thoroughness, etc. There are forty pupils in the high school this term. One more year has been added to the course, making it four years, and the Professor is adhering to the curriculum prescribed by the State School Commissioners in order to get an appropriation of six hundred dollars for the purchase of more school apparatus. He is specially anxious to get certain apparatus for his class in physics. He believes that half the power of driving home a truth is in the ocular demonstration. Our time was too limited to visit all the rooms. We reserve this pleasure for another day. He brought his class in Physics to the News office Monday afternoon, and our foreman put the machinery in operation in order that his explanations might be more readily comprehended by the students. We confessed to not having so much brightness in our office in a good while.

### Brought by the Stork.

A baby daughter arrived to gladden the home of Mr. and Mrs. Wm. E. Long, on South Palmetto avenue, Sunday. The new arrival will bear the name of Charlotte Marion Long.

Everybody seems to be painting up their buildings, and the painters are kept very busy.

## ...GLASSWARE...

We have the Best Stock in the City.
